

Let's make a Mobile!

We need:

- A long stick or branch.
- Pair of scissors
- Colouring materials: pens, crayons or pencils
- Trellis worksheet
- Gluestick or stapler
- Ribbon or wool
- Helpful adult.

Let's begin:

1. Ask your helpful adult to print the Trellis template, on page 3.
2. Colour the birds, butterflies and roses and cut them out. Cut three lengths of ribbon or wool. They can be the same size or different sizes.
3. Stick one end of a ribbon or wool to a bird, and stick the other end over the ribbon. Stick one end of the next ribbon to a butterfly and stick the other butterfly over it. Do the same with the roses.
4. Take the other end of the bird ribbon or wool and attach it to your branch. You can tie it on or make a loop by folding over the end and stapling it. Do the same with the rose and the butterfly.
5. Take another length of ribbon or wool and tie it to the branch to make a hanger. Where are you going to place your Trellis mobile?
6. William Morris was inspired by his own garden to make his Trellis design. Maybe you can make another mobile inspired by your own windowbox, garden or park.
